product

description

FED-PRO is a web-enabled Management System which helps solve the information management requirements for "No Child Left Behind" Federal Programs. Designed from the ground up, it provides an innovative dynamic data engine that allows District Administrators to modify and add data fields at any time without writing programming code or contracting expensive outside programmers. Any data fields that are added instantly become available for entry forms and reports.

The intuitive interface is simple to learn and use, and the task-based design makes daily management quick and easy. Here's a bonus, you can start using it in a couple of days NOT MONTHS.

user features

ADMINISTRATION

CREATE WEB-READY DATABASES

Add, Edit, Delete data fields including these types:

- Text
- Long Text
- Date
- Time
- Phone
- List
- Number
- Social Security
- Collection
- Collection List
- Images (tiff, jpg, bmp, etc)

Import and Export Data from many existing legacy systems:

- Import and export ascii comma delimited data to and from other applications. Importing accomplishes two tasks at the same time - creating the database table and headers "on-the-fly" while at the same time populating the database with the imported records.

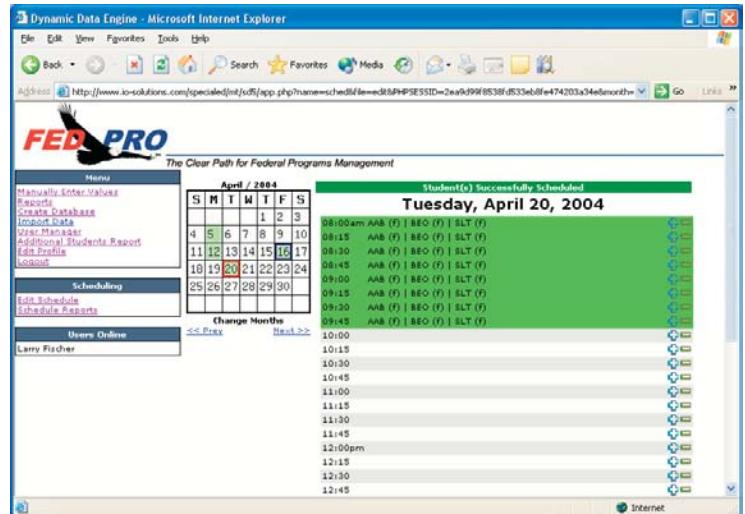

Reporting:

- Generate "one-click, up-to-the-second" reports from collected data on your own pre-printed forms
- Save reports and select which user in the system can view them.
- Set viewing permissions to expire at a future date.
- Save Graphs of the data as an image for future viewing and printing (high resolution for printing and low resolution for screen viewing.)

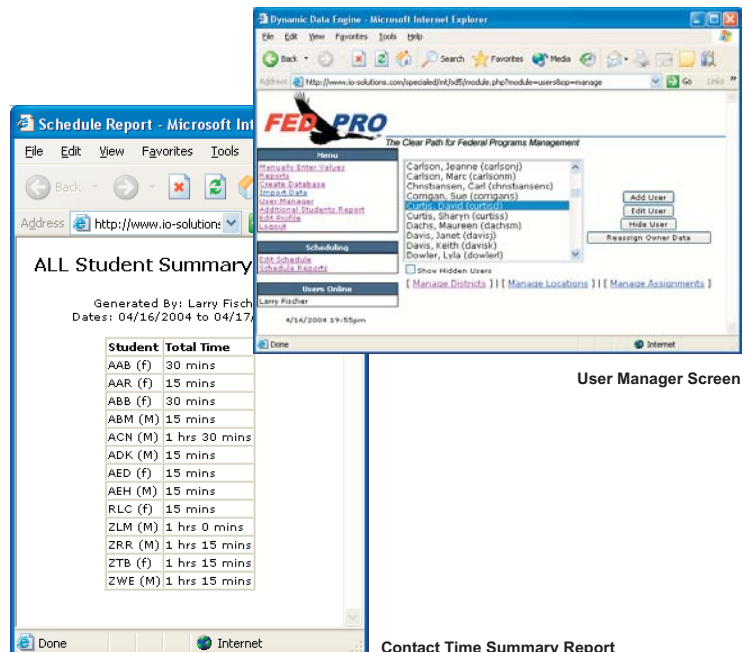

Teacher-Student Contact Hours Scheduling:

- Quickly schedule each student or group of students
- Setup repetitive schedules
- Get scheduled time and contact hour summary reports

## concept

The pricing shown below is our attempt to offer an equitable, straightforward, simple-to-understand pricing and service model. We offer the following options:

- IO Solutions provides the webserver, software and hosting
- OR -
- You purchase the software and host it yourself

**IO Solutions provides everything** - we encourage this service because you have minimal upfront investment in time and expense and you always have the latest version of the software included in the price. We also provide the webserver pre-configured and ready-to-use in one or two days along with all the server maintenance and oversight. Our availability is over 99.5%. That frees up your IT department to focus on what they do best -- keeping your existing computers and networks functioning properly.

**You purchase the software and host it yourself** - you will have the time and expense of acquiring and setting up a server and will be responsible to troubleshoot and maintain the server. Future updates to the software would require additional cost.

## pricing

**One-Time Setup Charge \$995.00**

- plus -

<b>IO Solutions provides everything:</b>	
1-99 Students	\$12.00
100-249	\$11.90
250-499	\$11.80
500-749	\$11.70
750-999	\$11.60
1000+	\$9.95

**Example: 100 students X \$11.90 = \$1,190.00 PER YEAR**

- or -

**You purchase it outright:**  
 Same student price as above times six (6).  
**Example: 100 students x \$3.85 = \$385.00 X 6 = \$7,140.00**

## training

Training available as needed \$125/hour  
 \*Travel extra and at actual cost
