

HYPERtm RACK

Learning Management System - Summary

The HYPERTrack Learning Management System provides an easy way for your organization to leverage its intellectual capital and increase Sales and Employee Performance.

Designed for online knowledge transfer, HYPERTrack makes it easy to instantly deliver information when and where you need it. The ability to assign, deliver and track any file format gives you the power to quickly build a *Knowledge Center* that reduces cost and enhances your organization's ability to succeed.

Intuitive interface, powerful features, and affordability make HYPERTrack the perfect choice.

Who should use it:

- Organizations of any size that need to manage and leverage their combined knowledge assets and best practices
- Associations, Special Interest, and User Groups
- Companies that need to prove they meet government compliance requirements
- Organizations that need to inform or train their employees, customers, and vendors
- Organizations who want a knowledge center with the minimum effort and expense

"HYPERTrack has been a great addition to my training program. The features are great and the price surprisingly affordable."

*Bob Mock, Corporate Manager - Supply Chain Training
Coca-Cola Enterprises, Inc.*
